

# Grand-Am Rolex Series

## Driver Performance Index

*The Driver Performance Index uses a points scale (1st = 280, 70th = 53) that awards points per finish position overall, with five bonus points awarded to each driver who led a lap, five bonus points awarded to the driver who led the most laps, two bonus points awarded to the fast qualifier, two bonus points awarded to the driver who turned the fast race lap, and one bonus point awarded to each driver who qualified a car. A perfect score of 1.0 would result if a driver or team won all possible races and all possible bonus points.*
